

Pyrox Gas Wall Furnace

Pyrox Gas Wall Furnaces

If heating only the living area of your home is what you need, then the Pyrox gas wall furnace is the solution. Designed to deliver floor level warmth, the Pyrox gas wall furnace is the ideal heater to accommodate living areas or large entertaining areas in any home. With Pyrox you have the choice of the Deluxe wall furnace or the Premium power flued wall furnace range that has an energy efficiency rating up to 4.3 stars*. The premium power flued range also uses a power flue system, which expels the combustion products outside leaving the air inside fresh and healthy.

Simple to use Electronic Control Panel

Rear register grille option - Heat Two Rooms

Features and Benefits

- Choice of two product sizes to heat small or large rooms
- Choice of inbuilt or console models
- Choice of standard or power flued models
- Stylish slimline cabinet
- Electronic ignition to eliminate the need for wasteful pilot lights
- Simple to operate electronic controls
- Three pre-set temperature settings
- Rear Register option to split heating into two rooms
- Cool touch exterior cabinet
- Direct replacement for most gas wall furnace models
- Two year parts and labour warranty.**
10 years parts only warranty on heat exchanger and burner.**
- Power flued 9kW unit has an energy efficiency rating of 4.3 stars.

Ideal for replacement or a new gas space heating installation

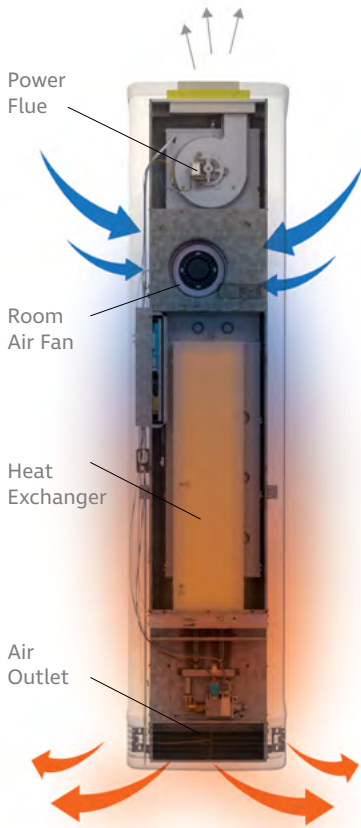

Ideal as a direct replacement for most gas wall furnace models, a Pyrox gas wall furnace saves you the expense of having to re-plaster and paint the wall area, or installing an unattractive infill panel if you install a different type of gas space heater. Often the installation is as simple as removing the old gas wall furnace and replacing it with a new Pyrox gas wall furnace. How easy! The Pyrox wall furnace is manufactured by Climate Technologies, one of Australia's leading manufacturers of heating and cooling products. Also manufacturing the well known Bonaire

brand, Climate Technologies has been providing state of the art, efficient heating and air conditioning systems for over 60 years. With ISO9001 quality accreditation, we are proud that Pyrox gas wall furnaces are Australian made at our factory in Adelaide, South Australia.

*40mj power flued model

**Domestic warranty only. Unit warranty for commercial applications is 1 year on all parts and labour.

How does the Pyrox Premium power flued gas wall furnace work?

The Pyrox Premium power flued gas wall furnace has a simple but efficient design. The room air is drawn into the unit by the room air fan located at the top of the unit. This air is then passed down over the heat exchanger to warm the air where it then is dispelled at floor level where it is needed. The flue gases from the combustion process are then expelled outside by the power flue through the flue system. This design efficiently provides comfort and warmth throughout the coldest winters.

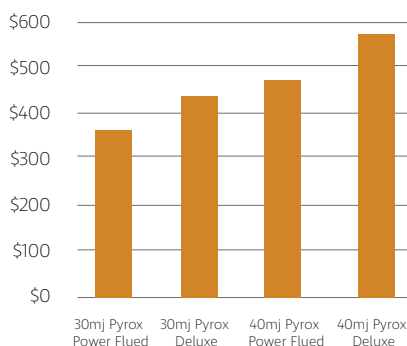

Which Pyrox gas wall furnace should I choose?

All gas space heaters are supplied with an Energy Star rating label. These labels provide details of the amount of gas each unit will consume over a normal winter. It's an indicative guide that outlines the running cost of a heater in terms of annual energy usage. The more efficient the heater the higher the star rating. The higher the star rating the more money you can potentially save on running costs. It makes economic sense to choose a Pyrox power flued gas wall furnace. It is also being better for the environment with more efficient gas space heaters emitting less greenhouse gas emissions.

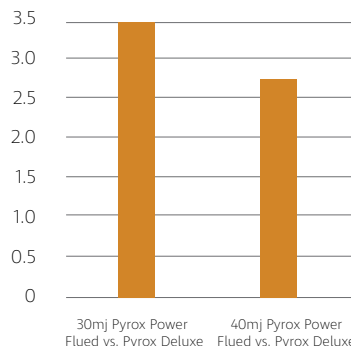

40mj Power flued model

Annual Estimated Running Costs*

Estimated Payback Period Years*

Approximate costs per year, based on average existing (pre-2005) 2-Star house in a Melbourne climate, 5 hours of operation (2.5 hours on high and 2.5 hours on low) for 100 days according to AS/NZS 5263.1.3:2016. Based on heating a medium sized 30 to 40m² room at a gas tariff of 2.64c/MJ. Room size will affect gas usage. The energy tariffs do not include any pay-on-time discount, or any any fixed supply charge. Actual costs for your house will depend on where you live, how you use the heating system (thermostat settings, operation modes, running time etc.), the area heated, house insulation and energy tariffs. Estimated payback period based on estimated retail purchase price difference of Pyrox units as at March 2019 versus estimated annual gas usage cost difference between the same sized Pyrox power flued and Pyrox deluxe wall furnace unit.

Replace an existing gas wall furnace

Pyrox gas wall furnaces are ideal for replacing existing wall furnaces, including other brands of gas wall furnaces. A Pyrox gas wall furnace saves you the expense of having to re-plaster and paint the wall area, or install an unattractive infill panel. Additional kits and additional installation may be required for a replacement installation.

Talk to your local gas heater specialist to discuss your product replacement requirements.
